. (Computer Engineering) (I Sem.) EXAMINATION, 2018

DATA STRUCTURES AND ALGORITHMS

(2015 PATTERN)

: Two Hours Maximum Marks : 50

— (*i*) Attempt Q. No. **1** *or* Q. No. **2**, Q. No. **3** *or* Q. No. **4**, Q. No. **5** *or* Q. No. **6**, Q. No. **7** *or* Q. No. **8**.

(*ii*) Neat diagrams must be drawn wherever necessary.

(*iii*) Assume suitable data, if necessary.

a) Explain static and dynamic data structures with examples. [4]

b) What is recurrence relation ? Explain with example. [2]

c) Explain the algorithmic strategy of divide and conquer. Explain its application in binary search. [6]

Or

a) Write pseudo C/C++ code for reversing a string and state its time complexity. [4]

b) Explain the need for fast transpose of sparse matrix. Comment on its time complexity. [2]

c) Explain two-dimensional arrays with row and column major implementation. Explain address calculation in both cases with example. [6]

P.T.O.

3. (*a*) Represent the following using GLL : [3]

$$(p,\ q(r,\ s(u,\ v),\ w)\ (x,\ y))$$

(*b*) Explain the algorithm for evaluation of a postfix expression with an example. [3]

(*c*) Write pseudo C/C++ code to delete a node from a doubly linked list. [6]

Or

4. (*a*) What is backtracking ? Explain the use of stack in backtracking. [4]

(*b*) Compare sequential and linked organisation of data. [2]

(*c*) Write pseudo C/C++ code to perform addition of two polynomials using arrays. [6]

5. (*a*) Define the following with example : [6]

(1) Multi-queue

(2) Dequeue

(3) Circular queue.

(*b*) Explain circular queue using linked list. Write pseudo C code for enqueue operation. [7]

Or

6. (*a*) Write pseudo C/C++ code to perform insert and delete operation on linear queue. [6]

(*b*) Explain priority queue. Write ADT for priority queue and state its applications. [7]

) What is heap ? Explain heap sort with suitable example. State its complexity. [6]

) Sort the following numbers using quick sort : [7]

25, 82, 17, 23, 38, 7, 64, 86, 21

State its time complexity and space complexity.

Or

) Write pseudo C/C++ code to perform shell sort. State its time complexity. [6]

) Explain linear search with example. State its time complexity and compare it with binary search. [7]
